

## DVI Optical Extender

# DSH

### ***Thank you for purchasing DSH***

*Optical DVI pigtail module extender extends DVI signal up to 300M using single strand multi-mode optical fiber. It transmits EDID information and HDCP over fiber in real time, So it can used with HDMI standard devices such as Blu-ray player, PS-3 etc.*

## Check your package

Check the package and make sure you have everything:

Contents

- (1) DSH Transmitter & Receiver
- (2) +5V DC Power supply x 1pc
- (3) User's Guide

If any of these items are missing in your package, contact OPHIT or your supplier for support.

**NOTE:** Package content may differ if you have placed a special order or placed order from anywhere other than OPHIT CO., LTD. OPHIT CO., LTD. reserves the right to make changes without further notice to a product described herein to improve reliability, design, packaging or function.

## Installation

Installation Steps:

1. Connect the Transmitter module to the DVI source device.
2. Connect the Receiver module to the display.
3. Connect a single strand multi-mode SC terminated optic fiber(50/125 $\mu$ m) from the Transmitter to the Receiver module.

## Installation

4. Connect the included +5V DC power supply into Receiver module.
5. Blue LED indicator on the modules will be light up after all connections are completed.

DC +5V  
Power jack

**NOTE:** The Transmitter module does not need to be externally powered unless the source device does not supply enough power through the DVI connector.

## Application

### ► Trouble shooting depending on LED indicator status

**No display TX Solid / RX Solid**

- Connect power supply into TX.

**No display TX Solid / RX Blink**

- Please make sure that optic fiber is well connected between TX and RX.
